

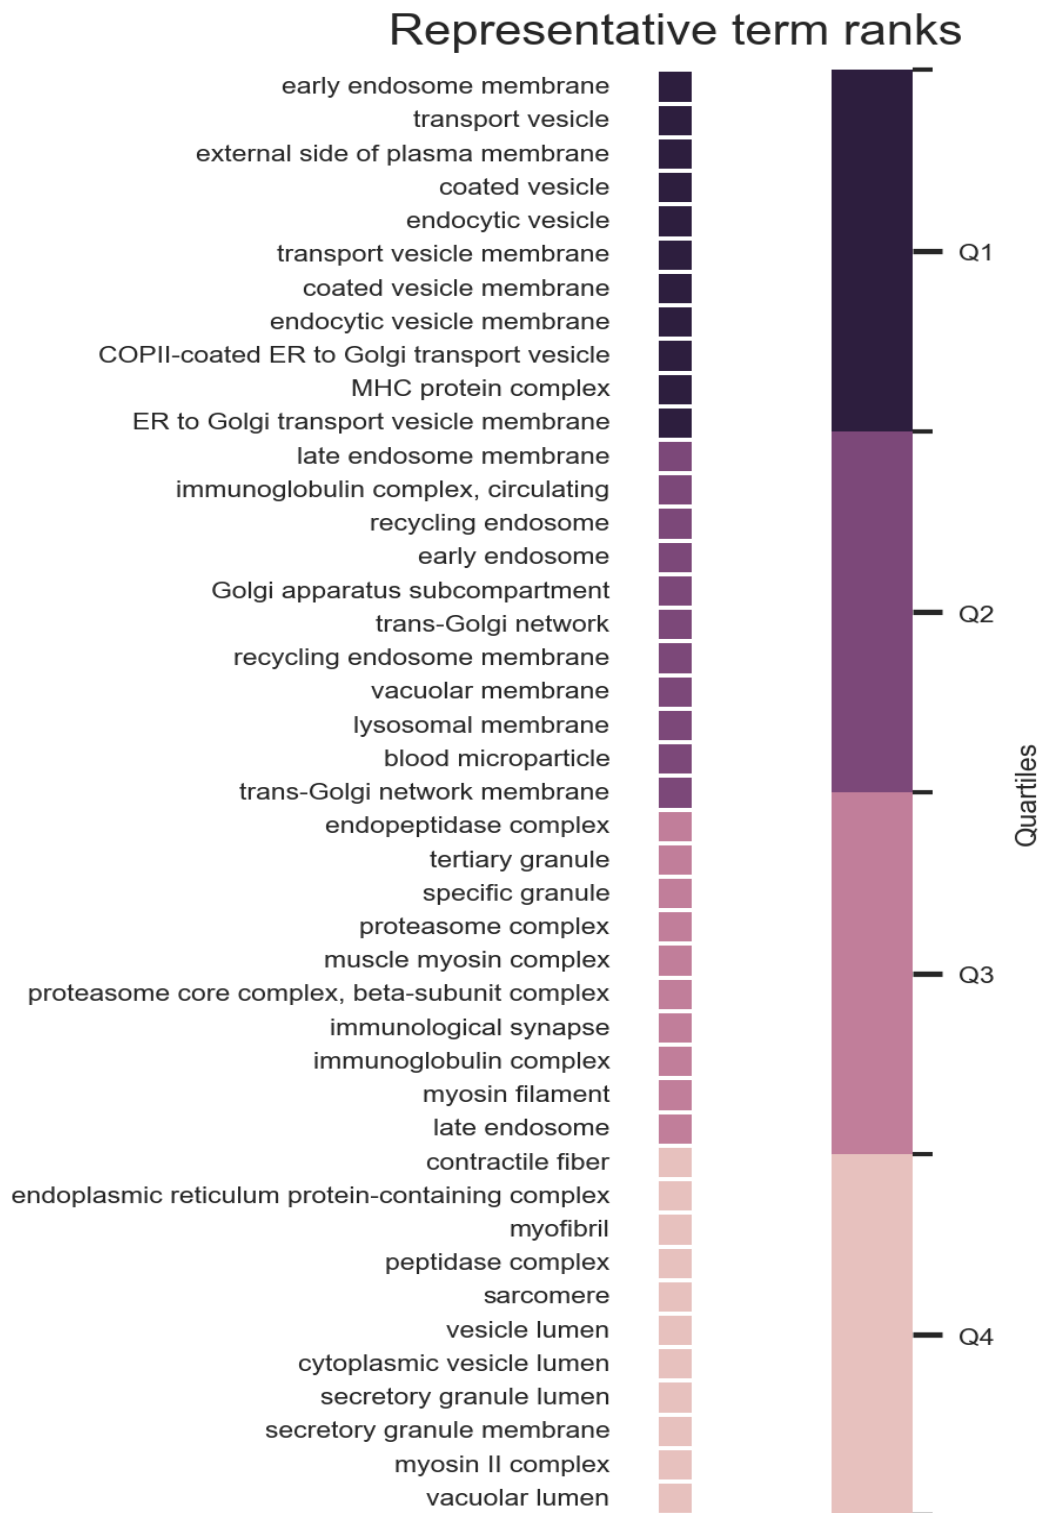

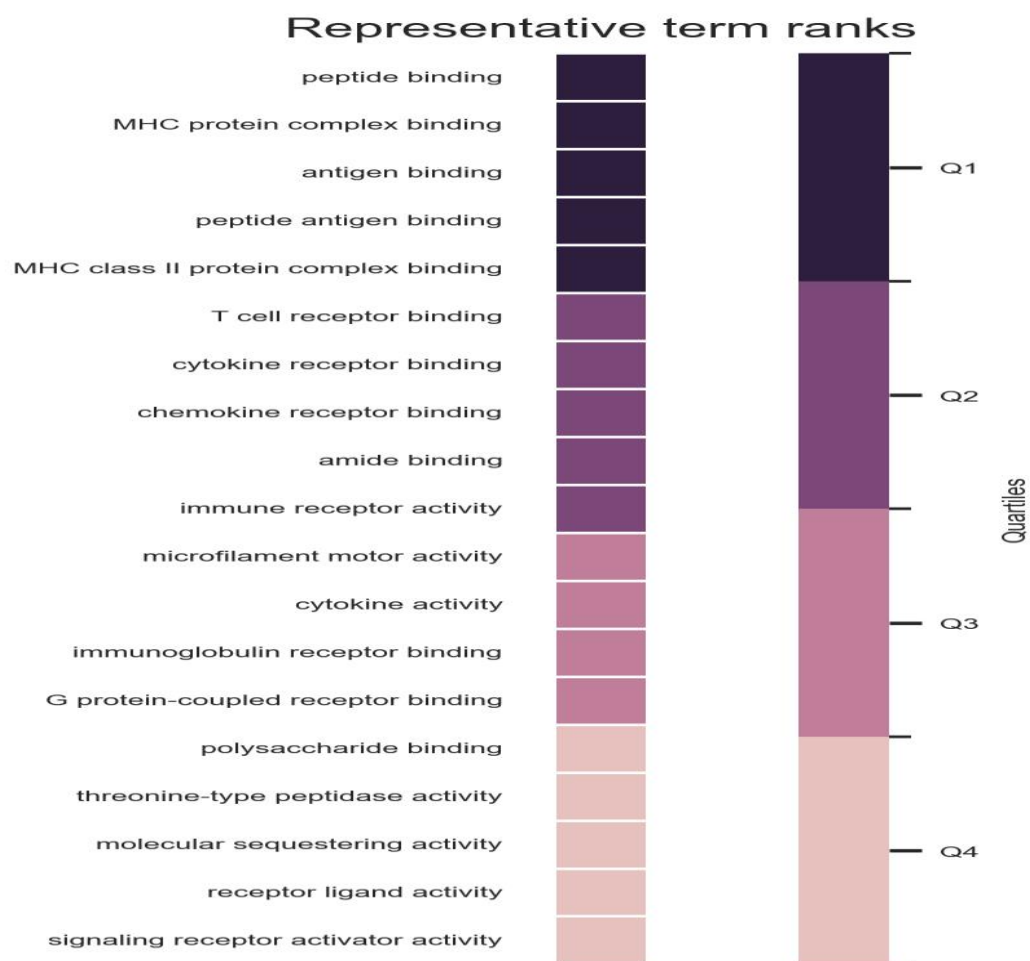

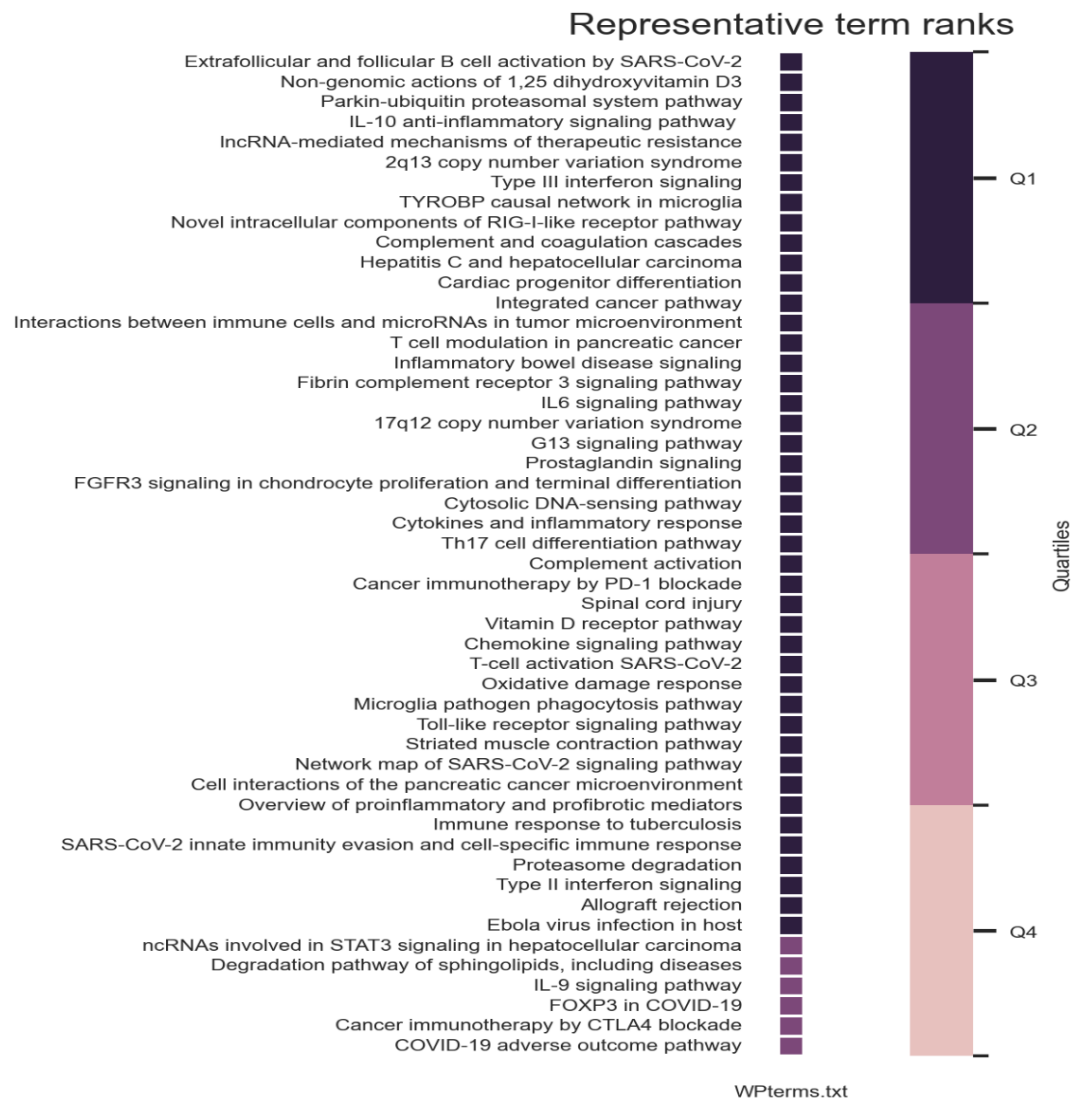

**Figure 1** – Depiction of the orsum summary for the GO:BP (super)terms for the 80 genes found. The top enriched GO:BP terms and their significance are represented in 4 quantile blocks.

**Figure 2** – Depiction of the orsum summary for the GO:CC (super)terms for the 80 genes found. The top enriched GO:CC terms and their significance are represented in 4 quantile blocks.

**Figure 3** – Depiction of the orsum summary for the GO:MF (super)terms for the 80 genes found. The top enriched GO:MF terms and their significance are represented in 4 quantile blocks.

**Figure 4** – Depiction of the orsum summary for the WP (super)terms for the 80 genes found. The top enriched WP terms and their significance are represented in 4 quantile blocks.
